PROFESSIONAL SUMMARY

Operations, procurement, and logistics leader with a career spanning bulk-materials management, multimodal transportation, greenfield construction, and cross-functional operational governance. Recognized for structured, systems-based leadership integrating safety, cost, and throughput to achieve reliable, zero-accident operational performance across multiple industrial environments. Experienced in optimizing large-scale material flows, reducing variance, and strengthening supplier alignment. Skilled in ERP/SAP-driven planning, measurement discipline, process control, and pragmatic adoption of AI-assisted tools for workflow optimization, vendor scoring, and performance forecasting.

CORE LEADERSHIP THEMES

Strategic Leadership & Oversight – Systems-driven operator governing safety, cost, and throughput. Zero-accident record across all supervised operations.

Operational Optimization & Efficiency – Delivered measurable improvements including 12-18 hour vessel-turnaround reductions, shrink reduction, and loading-efficiency gains through redesigned SOPs and throughput modeling.

Procurement & Vendor Strategy – Long-term supplier alignment, contract compliance, cost stability, and KPI enforcement across diverse bulk-material supply chains.

Safety, Compliance & Risk Management – Catastrophic-loss prevention, safety culture integration, and emergency action planning across port, terminal, and biomass operations.

Cross-Functional Leadership – Developed accountability systems across logistics, maintenance, engineering, production, and safety teams; mentored emerging leaders and improved internal communication structures.

Greenfield Construction & Commissioning – Core team member in planning, construction, and operational startup of multiple facilities (\$50M-\$90M), ensuring seamless handoff from construction to operations.

Technology Integration – Utilizes ERP/SAP workflows, operations data modeling, and AI-assisted tools for vendor scoring, forecasting, and workflow clarity.

CAREER HISTORY

Daychanger Enterprises LLC — Muscle Shoals, AL

Chief Executive Officer (CEO) | 2023–Present

- Architect of the CoSyn Governance Stack v8.1, a pragmatic AI governance framework used to improve clarity, reproducibility, and process control in business workflows.
- Implement deterministic protocols (Scope Clarification, Bias Transparency, Pre-Render Audit, Source Fidelity) to stabilize AI-assisted decision making.
- Integrate AI-supported workflow tools for clients in logistics, procurement, and operational analysis.
- Mentor cross-functional client teams transitioning to structured operational systems.
- Maintain full ownership and development pipeline for AI-enabled operational governance.

Pyletech Energy — Remote / SE U.S.

Director of Procurement & Logistics | 2023–2025

- Directed procurement and multimodal logistics for renewable-energy development across several states.
- Built vendor-performance frameworks and contract-alignment mechanisms ensuring cost and schedule reliability.
- Coordinated engineering, permitting, and commercial stakeholders using structured planning systems.
- Applied AI-assisted vendor scoring and forecasting tools in support of procurement evaluation.

Daychanger Enterprises LLC — Muscle Shoals, AL

Chief Operating Officer | 2019–2023

- Directed multi-channel service-logistics operations, inventory systems, vendor coordination, and compliance workflows.
- Implemented accountability structures for field teams and improved communication between operations, finance, and client services.
- Oversaw marine-sector regulatory alignment and safety adherence.

Host Terminals, Inc. — Chesapeake, VA

Terminal Manager (Greenfield Port Project) | 2016–2019

- Managed full commissioning, construction coordination, and startup of a **\$90M port terminal** handling 1.5M MT/year.
- Delivered measurable efficiency gains including faster ship-loading cycles and reduced demurrage through improved sequencing.
- Integrated safety programs from multiple organizations, achieving a **zero-accident record** during startup and operations.
- Improved port logistics reliability through refined SOPs, contractor oversight, and predictive maintenance alignment.
- Mentored maintenance and operations personnel, creating a pipeline of shift leaders.

Drax Biomass, Inc. — Monroe, LA

Regional Logistics Manager | 2014–2016

- Managed logistics and export operations supporting **900,000 MT** of annual shipments.
- Core contributor to the startup of a **\$50M terminal** including system integration and workflow design.
- Reduced shrink and improved measurement accuracy through variance tracking and scale validation.
- Oversaw quality during truck, rail, and vessel loading, identifying spec variances and contamination issues.
- Led crossfunctional communication between production, port operations, maintenance, and safety.

Georgia Biomass, LLC — Savannah, GA

Logistics & Production Control Manager | 2010–2014

- Managed production flow, inventory, rail logistics, and vessel-loading operations for **750,000 MT/ year** of outbound product.
- Supervised processing of **1.5M tons** of wood chips annually, implementing chip-quality assessments and moisture-control protocols.
- Improved loading throughput and vessel turnaround through sequencing models.
- Coordinated with Accounting on inventory reconciliation and period closeouts.
- Developed operational leadership among frontline supervisors.

Wall Timber Products LLC — Various Locations

Area Manager | 2007–2010

- Managed 35 employees and delivered **1M tons of chips** annually.
- Oversaw fleet operations, maintenance, and catastrophic-loss prevention.
- Ensured consistent product quality and schedule adherence.

Rayonier Performance Fibers — Jesup, GA

Woodyard Area Manager | 2003–2007

- Supervised 25 union personnel in high-volume chip yard operations.
- Delivered zero-accident performance in 3M+ tons/year chip-handling operations.

Pulpmill Shift Superintendent

- Managed pulp production systems and safety compliance for a major shift.

Chip Logistics & Quality Coordinator

- Managed flow of **3M+ tons** of chips; performed chip-quality and contamination assessments.
- Ensured measurement accuracy through scale checks and variance reconciliation.

Procurement Forester

- Supported fiber procurement, vendor evaluation, tract inspections, and sourcing.

Dimension “D” LLC — Consultant & Owner | 2001–2003

- Provided industrial optimization consulting; delivered seminars and financial models improving customer equipment performance.

Champion International Corp. — Various Locations

Fiber Supply Analyst | 1995–2001

- Managed fiber procurement data, cost analysis, and forecast modeling.

Procurement / Land Management Forester

- Performed timber procurement and quality inspections; ensured delivery spec adherence.

EDUCATION

Master of Science, Forestry — University of Tennessee, Knoxville Bachelor of Science, Forestry — University of Tennessee, Knoxville

TECHNICAL & OPERATIONAL SKILLS

ERP/MRP Systems • SAP Familiarity • Multimodal Logistics • Bulk Sampling & Weighing • SOP Development • Contractor Oversight • Predictive Maintenance Alignment • AI-Assisted Workflow Tools • KPI Systems • Inventory Reconciliation
